

INCIDENT INVESTIGATION & ROOT CAUSE ANALYSIS

With RSSI's Incident Investigation & Root Cause analysis course, you will learn best practices in team assembly, data collection techniques, effective interviewing and application of root cause analysis to determine causation and prevent reoccurrence.

RSSI expert instructors have conducted incident investigations at a variety of sites across the process industries and studied the investigation and analysis conducted by regulatory agencies as well as other process safety professionals. Their teaching combined with hands on experience in our popular workshops allows you to return to your facility with the knowledge and tools to lead an incident investigation.
