

## PROCESS HAZARD ANALYSIS FOR TEAM LEADERS

PHA (Process Hazard Analysis) is required by OSHA's Process Safety Management (PSM) standard, 29 CFR 1910.119 and EPA's Risk Management Plan (RMP) rule, 40 CFR Part 68. Learn this fundamental part of managing your facility's risk.

RSSI expert instructors have real world experience in facilitating PHA's across the process industries. Our popular workshops will give you hands on experience in the best practices of PHA facilitation and participation. Bring back to your facility the tools and training needed to be an efficient and thorough PHA team leader. Pair this with our Layers of Protection Analysis course for our full risk assessment suite.

### Benefits

- Learn the fundamentals of PHA facilitation from preparation through reporting
- Practice your skills and receive direct feedback in the daily workshop sections
- Hazard and Operability Studies (HAZOP) | What-If Analysis | Failure Modes and Effects Analysis (FMEA)

### Prerequisites

- Process Safety & Risk Management Compliance

### Logistics

- 3 Day Course | 8am – 5pm
- 2.1 CEUs
